SIMPLICITY REDEFINED

A3 Colour bizhub C287 Series

bizhub c287/c227 

Giving Shape to Ideas

The new bizhub C287 series is compact and light, enabling it to fit in almost any type of working space.

Equipped with a 7-inch operation panel that provides multi-touch sensitivity and intuitive operability. It is user-friendly and comes with on-screen menu keys that allow users to register up to 9 commonly used functions such as copy, scan/fax, preview or soft numeric keypad.

Its intuitive INFO-Palette design provides seamless operation to users to ensure users have consistent experience across PCs, tablets or smartphones.

The new bizhub C287 series comes with an embedded widget application where users can install and execute within the MFP operation panel. Text boxes, icons or GIF animations can be configured and used for internal communication such as messages and rules.

The function icons can be enlarged and screen display colour can be reversed for ease of use.

PRINT FROM ANYWHERE, ANYTIME

> Connect with Android devices

Android^{*1} users can print via Near Field Communication (NFC) by tapping on the new Mobile Touch Area on the operation panel. Users can tap their Android device on the Mobile Touch Area to pair with PageScope Mobile (PSM) to authenticate and to perform print^{*2} or scan^{*2} job.

*1 NFC connection requires Android OS 4.4 or higher to be installed.

*2 Wireless LAN environment is required to perform touch to print and scan.

> Connect with iOS devices

iOS users can benefit with easier printing steps. Users search and register MFP on the PageScope Mobile (PSM)^{*3} via Bluetooth LE (BLE)^{*4} technology. Additionally, iOS devices can be used to log onto the MFP through BLE connection. Select files on to the PSM to print^{*5} directly from or scan^{*5} files directly to the iOS devices.

*3 PageScope Mobile for iPhone/iPad version 5.0 or higher is required.

*4 Optional Device Connection I/F Kit EK-609 is required.

*5 Wireless LAN environment is required to perform print and scan.

> Wireless LAN (AP mode) support

Wireless LAN (AP mode) connection image

With added option, bizhub C287 series MFP becomes a wireless LAN access point, allowing connection between MFP and mobile devices, without accessing to company LAN.

* In AP mode (base unit), simultaneous connections can be made with up to 5 devices.

Mobile devices are able to connect directly with bizhub, through the existing wireless LAN Access Point^{*6}. The direct connection is securely separated from the company's existing LANs.

The set up can be completed simply by scanning the QR code that is displayed on the operation panel.

^{*6} Optional Upgrade Kit UK-212 and Device Connection I/F Kit EK-608 or EK-609 are required.

> Standard web browser

Users can browse the internet and print directly from bizhub C287/C227 multi-touch UI on the operation panel. It is especially useful for printing that requires portions of PDF files that can be viewed on websites or maps for places you are about to visit.

CONNECT INSTANTLY WITHOUT PRINT DRIVERS TO INDUSTRY STANDARD MOBILE TECHNOLOGIES

AirPrint

Apple's standard printing system compatible with iOS 4.2 and Mac OS 10.7 or later. A compatible printer on your wireless LAN can be used.

Mopria Print Service

Wireless printing technology established by Mopria Alliance. It allows you to print from devices installed with Android 4.4 or later.

Google Cloud print

A cloud print service provided by Google. You can print from any location via the internet regardless of OS or device type.

^{*}Optional Upgrade Kit UK-211 is required.

Konica Minolta Print Services

Print directly to bizhub via a wireless LAN from all apps that supports Android's print function.

PageScope Mobile

Konica Minolta's proprietary mobile print application allows usage of wide range of bizhub functions such as duplex print, security print, staple and punch.

ID Card Authentication

SECURE TECHNOLOGY

➤ Authentication on the MFP main unit

Authentication can be performed directly on the main unit. Detailed access control can be set up for each function including copy, print, scan and fax*¹.

*¹ FAX feature requires optional FAX Kit FK-513 and HDD HD-522.

➤ IC Card Authentication

Users can authenticate*² with various types of IC card*³. The authentication method complies with SSFC (Shared Security Formats Cooperation) standard. Besides the IC card, authentication can also be performed with any Android devices*⁴ that comes with NFC antenna.

*² Optional Authentication Unit AU-201S and Device Connection I/F Kit EK-608 or EK-609 are required.

*³ Compliant non-contact IC cards include FeliCa (IDm), SSFC, FCF, FCF (campus), FeliCa Private, and MIFARE (UID).

*⁴ Requires Android 4.4 or later that supports HCE (Host Card Emulation) or PageScope Mobile for Android v4.1 or later.

➤ Biometric Authentication*

Users can authenticate via finger veins. The biometric authentication is easy to implement and cannot be forged.

* Optional Biometric Authentication Unit AU-102, Working Table WT-506 and Device Connection I/F Kit EK-608 or EK-609 are required.

➤ ID & Print

Users who are concerned about information leakage during print can set a password in the printer driver before executing the print. The MFP will release print when the correct password is entered on the MFP operation panel.

➤ TPM (Trusted Platform Module)

TPM (Trusted Platform Module) is a security chip which encrypts and decrypts confidential data. The information is encrypted and stored in a dedicated storage area in the chip to avoid unauthorised reading.

* Optional i-Option LK-115 v2 is required.

➤ Server-less Pull Printing

The implementation of server-less pull printing system is easy and low in cost. This allows users the flexibility to print from any MFP in the same network.

* Options required

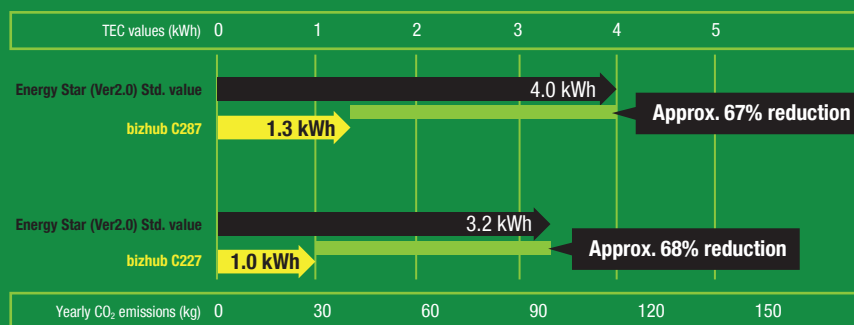

- Base unit: LK-114 + UK-211 + HD-522
- Client unit (Web Browser OFF): LK-114 + UK-211 + HD-522
- Client unit (Web Browser ON): LK-114

Sustainability

➤ Top-class low power consumption

The bizhub C287 series' power consumption is significantly lower during the sleep mode as the CPU is switched off. With only a mere 0.5W power consumption during sleep mode, it has less environmental impact due to lower TEC value at approximately 67-68% and lower CO₂ emission.

- Values for 220-230 V
- TEC values applied to the International Energy Star Program Version 2.0

Yearly CO₂ emissions:
TEC value x 52 weeks x emission factor
(From the November, 2011 press release by Japan's Ministry of the Environment.)
